

IndigoClean

Raw Wash Water

IndigoClean module with 6 m² filter area
L x W x H [mm] = 700 x 655 x 160

Wash Water Filtrate

Finally solves: Indigo waste problem chemical-free

IndigoClean is an innovative treatment process **based on micro filtration for safe and reliable removal** of indigo and other particles, larger than 0.1micron, from raw wash water.

At the core of **IndigoClean** is a heat and chemical resistant, highly and hydrophilic ceramic membrane.

Benefits

- 3-10x the flux compared to alternative systems
- Unmatched low footprint due to stackable design
- Low pressure operation at high flow 0.3 – 0.7 bar
- **High recovery rates of more than 99.9 %**
- Applicable for high sludge

Process

- Robust and easy to use design
- **Low Energy consumption, as low as 0.2 – 0.5 kWh/m³ treated**
- Proven technology in many other applications

Rental System

- **Pilot Test Plant 6m³**
- Pilot test equipment available
- **Price on request**

Sales Price

- Operational systems upon request
